New Viking Professional Micro Green & Herb Growing Cabinet in Select Markets

Greenwood, MS, March 2018 - Viking Range, LLC, a leader in kitchen technology, is pleased to announce the rollout of a new Viking Professional Micro Green & Herb Growing Cabinet. The 24" under counter unit allows consumers to grow herbs and micro greens 365 days a year.

The unit includes two growing trays, two 4" propagation domes, two hydroponic growing mats, pH and TDS calibration solutions, measuring syringe, sifter, hydrogen peroxide and a 20 gallon tub.

A fully contained ecosystem is ideal for growing herbs and micro greens. The cabinet is equipped with high output T5 growing lights to replicate the sun's rays and get the best growth possible. The light is distributed evenly with diffuser panels. The system also features a filter with a water pump for irrigation. It can be manually filled or connected with city water and drain.

The digital system is fully automated for light, watering and air circulation for optimal growth. It comes with 39 preprogrammed cycles for the most common greens, plus it is fully programmable for custom cycles.

Each zone in the unit accommodates one 10"x20" growing flat. Users can simply sow their seeds in the flats using traditional soil or hydroponic media. Cover the trays with the unit's humidity domes and place them in the cabinet. Next, set the growing cycle for your particular plants and when the seeds begin to sprout, the humidity domes should be removed. Grow until the herbs are ready to harvest, depending on the variety of plant, this cycle could be as little as seven days.

The herb grower is compact and installs under countertops in any space. It also features removable growing drawers on easy gliding rollers with drainage holes in the rear for ebb and flow irrigation. The double pane tempered glass allows easy viewing.

The innovative Viking Micro Green & Herb Growing Cabinet is now available at select authorized Viking dealers in the Chicago metro area and the state of California.

Viking Range, LLC originated ultra-premium commercial-type appliances for the home, creating a whole new category of home appliances. Committed to innovative product design, unrivaled performance and peerless quality, Viking is headquartered in Greenwood, Mississippi, and is a subsidiary of The Middleby Corporation, a long-time leader in commercial kitchen technology.
