

# WHO IS USING BLUEZONE?

## UNITED STATES NAVY

The Navy conducted studies showing BlueZone Technology extends the shelf life of food up to 3 weeks.

## FLORAL INDUSTRY

The most popular flowers, carnations, roses, and lilies, are highly sensitive to ethylene gas. BlueZone extends the life of these cut flowers by 7+ days.

## REFRIGERATED TRANSPORT

Maersk studies show BlueZone added 13+ days to shelf life. Maersk CCO Soren Johanssen calls BlueZone "a game changer".

# AND NOW...

## VIKING 7 SERIES REFRIGERATION

Viking is the first appliance manufacturer to use this innovative technology in a residential product to significantly extend food shelf life, improve food quality and flavor, slow the ripening process, reduce mold and eliminate odors.
