

# Powerful yet comfortably quiet

- **Quietest hood and ventilator combination in the industry\***
  - » Tough-box ventilator housing protects blower and quietly delivers powerful smoke and odor removal
  - » Maintenance-free ventilators never need to be cleaned with the commercial-type hood filters doing the dirty work
- **Modern controls**
  - » Backlit LED knobs extend and illuminate to control lighting level and fan speed, then fully retract when not in use
- **Ultra-efficient heat sensor**
  - » Cook with peace of mind as the built-in heat sensor activates the ventilator to full power if cooking temperatures reach uncomfortable levels
- **Heat lamps**
  - » Heat lamps conveniently keep food warm until ready to serve (not available on Island Hoods and bulb not included)
- **Bright LED lighting**
  - » Dimmable lighting controls provide custom illumination for enhanced surface cooking visibility
  - » Long-life LED light bulbs are energy efficient and easily replaceable

\*Ventilators are sold separately and are available in several CFM options for use in all cooking applications

Proudly made in Greenwood, Mississippi USA
