Art from Nature

Make a statement with fabulous deck railings that harmonize with the surrounding landscape. Mountain Laurel deck handrails are works of art, handmade with sticks and branches, each one with its own unique bends and curves, artfully woven together and attached to two-by-fours on top and bottom. The end result is one-of-a-kind custom railing with a rustic, almost otherworldly quality. Each of these handrails are made to your deck's specifications and arrive pre-constructed, allowing you to get as close to nature as possible in your new home.

Plan and Protect

In an emergency, every second counts. The Nest Protect smoke & carbon monoxide detector not only sounds an alarm, it also speaks with a human voice, telling you what the problem is and where it is. Know if there's smoke or carbon monoxide, which room it's in, and if you're in immediate danger so you can quickly figure out the best way to exit your home and avoid running into fire on the way out. Nest Protect will send a message to your phone or tablet if there's a problem, and you can check on things at any time with the Nest app. Use the What To Do feature inside the Nest app to create a plan before you ever need it. Choose a family meeting point and add phone numbers for your local fire and police departments.

Clear the Air

In a kitchen full of aromas, allow the scent of fresh food to emerge above the rest. Viking Professional Ventilation offers classic Viking appeal – heavy-duty with a clean look and a virtually seamless design. This new line of ventilation hoods features dimmable LED lighting and the ability to easily adjust the fan speed while cooking. Other features include quiet, efficient, maintenance-free

ventilators, heat lamps, and easy-to-clean, dishwasher-safe baffle filters. The new ventilation hoods are available in seven exclusive colors including stainless steel, graphite gray, apple red, and cobalt blue. Built-in custom ventilators with the same exclusive features are also available to create a hood to match custom cabinetry.

Home Sensing Solution

A revolutionary home sensing solution, Wally detects and alerts you of water leaks as well as important changes in humidity and temperature. Wally uses the existing wiring of your home's walls to create a sensor network, and sets up easily in under an hour. Simply place wireless sensors around your home, connect them to the network using the Wally

app, and your home is protected. Wally lets you and the people on your alert list stay connected with your home from anywhere via the Wally app and website. Receive instant text or email notifications with detailed, specific information that can keep small problems from turning into big, expensive ones.

Pristine Views

Aluminum Breeze Panel™ Folding Glass Walls from Zola European Windows can completely fold away and stow to the side, opening living spaces entirely to the outdoors. The lightweight, flexible and corrosion-resistant folding wall systems provide expansive glass up to 32 feet wide with unsurpassed thermal performance in this size class. Aluminum Breeze Panels can be made in any configuration of three to eight panels, with custom solutions available for even larger openings. One leaf can operate as a regular door, and you can choose whether the panels stack to the left, right or to both sides, opening either inwards or outwards. Multi-point locks provide superior sealing capabilities and increased security. With minimal vertical dividers, Aluminum Breeze Panels look as elegant closed as they do open.
