

Durable Decking

Clubhouse® PVC Decking offers a unique construction that delivers durability that's built to last. Engineered with proprietary Korelite™ technology, it possesses a dense cell structure that blocks moisture and provides unsurpassed strength under foot. It's also guarded by SunShield®, an exclusive Deceuninck technology that fights the harsh effects of the sun, including UV rays, brittleness, and surface degradation as well as rain and humidity. So your deck can maintain a fresh look, even in high traffic areas. Backed by a limited lifetime warranty with 25-year fade and stain protection, Clubhouse Decking presents a variety of vibrant color options. In addition to the beautiful colors and low-maintenance benefits, Clubhouse Decking is environmentally-friendly and sustainable. It's 100% recyclable and never needs painting. Cleaning is as easy as soap and water. As an added benefit, you can avoid having to re-stain or replace weathered, fading wood. The hidden fastening system facilitates easy installation, and gives a seamless aesthetic. Its hidden fastener biscuit acts to space decking boards and the ConnectClip leaves surfaces unmarred. Clubhouse decking is 100% PVC and contains no wood or wood fillers. This means you'll never worry about wood related problems such as insect infestation or rot. www.clubhousedecking.com

Innovative Grilling

Viking Range, LLC, a leader in kitchen technology, introduces a new line of Viking Professional Outdoor 5 Series grills, carts and companion units to its already extensive line of Outdoor products. The previously offered 500/300/100 Series of grills have been consolidated to this innovative, feature enhanced line of ultra-premium 5 Series Grills. This new line of outdoor grills is 24" deep which make it easier for the consumer to upgrade and replace their old grill with an innovative Viking Professional 5 Series Outdoor Grill. The 5 Series Grills can be easily lit with the one touch 120V electric ignition system and automatic re-ignition ensures that the grill reignites

if the burner flame should be inadvertently extinguished. Design enhancements include Viking Blue SoftLit™ LED Lights which accent the control panel and illuminate knobs for better visibility when grilling at night. The companion Side Burner and Wok Cooker, along with warming drawers, ventilation, undercounter refrigeration and stainless steel outdoor cabinets complete the Viking Professional Outdoor Kitchen. The Viking Professional Outdoor 5 Series grills are available in 30"/36"/42"/54" widths in both LP and natural gas and backed by the Viking 2-Year Signature Warranty. www.vikingrange.com

Room With A View

Using clear vinyl with motorized screens by Phantom Screens enables you to control the temperature in your outdoor living space without blocking your view. In cooler climates it's designed to keep the warmth in and for hotter climates it's perfect for keeping cooled air in your covered porch or patio area. It also protects your living space from rain, wind and debris so you can spend more time in your outdoor living space without being limited to one or two seasons! Custom-made and professionally installed, clear vinyl retractable screens disappear all at the touch of a button or smartphone app! Phantom Screens provides retractable screens for doors, windows and outdoor spaces that won't get in the way of your view. www.phantomscreens.com

Summer Cover

Extend your living space out into your patio/entertaining area with a pergola that is architecturally handsome and always inviting. Include an outdoor kitchen and a shade canopy that affords you even more time outdoors, by providing shelter from the rain or hot summer sun. Handcrafted in low maintenance AZEK, cellular PVC. Standard kit

pergolas available or a custom pergola can be created with curved beams, long spans, privacy lattice panels, and more. Walpole has extensive experience working with homeowners and professionals – providing design expertise, structural planning, and unmatched manufacturing. www.walpolewoodworkers.com

Bear Necessities

There's nothing like a house in the woods, until it's discovered by bears. A thrilling sight to see outside, a bear is less than charming when it's trying to invade your home for a snack. The desire of builders and homeowners to bring the outdoors in, yet keep the bears out, can now be resolved with the NanaWall BEARricade™. It's a folding glass wall that opens wide to erase indoor/outdoor boundaries when the coast is clear, yet provides unequalled

security and defense from bears when closed. This new system provides all the attributes of a NanaWall opening glass wall—indoor/outdoor lifestyle, fresh air ventilation, and open views—now with bear-resistant strength added to its list of unmatched performance features. The system is specifically designed for security and strength while providing large glass openings, up to 38-feet wide, and unequalled weather protection for

all seasons. The NanaWall BEARricade is equipped with reinforced structural posts and impact-rated, laminated glass to provide unparalleled resistance against a bear's ability to collapse the glass panels. Also, a secure, tamper-resistant lock engages with the turn of a handle for a secure multipoint connection. www.nanawall.com
