Electric Oven by Viking

What's Cool *Everywhere Else*

The Amanpuri bathtub by **Blu Bathworks** maximizes space with recessed storage solutions and is suitable for freestanding or alcove installations. The tub is made from blu-stone, the company's signature eco-friendly stone material that is crafted from quartzite, while the modular shelving units are available in a choice of European oak-stained wood or in a white matte or glass lacquer finish. Coordinating vanities, mirrors and wall cabinets are also available. **Circle No. 225** or visit kbbonline.com/freeinfo

3form has announced its new Versa partition hardware and table bases in angular profiles and new color offerings in signal white, jet black and carbide. The Versa partition system offers architects and designers a kit of parts to customize the details to their specs. The new angular profiles are called block, beam and bar and are an ideal choice for an industrial design. **Circle No. 226** or visit kbbonline.com/freeinfo

The Senu Sence from **Derek Marshall Lighting** is created through hot glass being forged into the shape of a Japanese sensu – a traditional folding fan. It provides a smooth up and down ambient light wash and measures 16-in. x 12-in. x 4-in. It can be lit with up to 100-watt incandescent, halogen, CFL or LED bulbs. **Circle No. 227** or visit kbbonline.com/freeinfo

Luxe Linear Drains now offers its stainless steel tile insert drains in a square shape. The 5-in. x 5-in. square drains appear to vanish into the shower floor and are the ideal replacement for the round-center drain. They accept any porcelain, ceramic, natural stone or glass mosaic tile materials up to .75 inches and have been designed with welded 2-in. central diameter outlets. **Circle No. 228** or visit kbbonline.com/freeinfo

The **Viking Professional French-Door Double Oven** features side-swing doors that make it highly accessible; a Gourmet-Glo glass-enclosed infrared broiler; a Vari-Speed Dual Flow convection system; and CoolLit LED lights in the metal knobs that light up when the unit is turned on. The extra-large 4.7-cubic-ft. oven also offers 11 high-performance cooking modes. **Circle No. 229** or visit kbbonline.com/freeinfo
