

TESTING FOR SUCCESS

A FEW WAYS VIKING QUALITY IS PUT TO THE TEST

Camera system on all ranges and rangetops verify all components are packed (i.e 4 legs, 4 burnercaps, etc.) and a photo of every unit is electronically stored.

All ranges, refrigerators, and wall ovens are tested with an automated electronic tester.

All test data is stored electronically for future reference.

Every gas range is tested at 3 different locations for gas leaks prior to electronic testing.

Every refrigerator is tested for 3 hours after passing the end of line tester to chart temp fluctuations in fresh food and freezer.
